in mohannadelhamod

Education

Virginia Tech, Blacksburg, VA

Ph.D. candidate in Computer Science
GPA: 3.78

August 2023

McGill University, Montreal, QC

M.Eng in Computer Engineering
GPA: 3.83

April 2012

Jordan University of Science and Technology, Irbid, Jordan

B.Sc in Computer Engineering
GPA: 84.4%. Rated Excellent

June 2007

Research Interests

Interested in Science-Guided Machine Learning and ML interpretability and visualization tools. Involved in interdisciplinary projects that span a variety of scientific domains, including physics and biology.

Research Experience

Science-Guided Machine Learning Lab, Virginia Tech

Graduate Research Assistant

August 2019 — Present

- Supervised by Prof. Anuj Karpatne.
- CoPhy-PGNN: Learning Physics-guided Neural Networks with Competing Loss Functions for Solving Eigenvalue Problems:**
 - Investigating a deep learning approach to the computationally expensive eigen-decomposition numerical solvers.
 - Showing applications in quantum physics and electromagnetic propagation.
 - Achieving high accuracy with low computational complexity.
 - Using loss landscape visualization to explain the method's advantages.
- Guiding Neural Networks Using Taxonomies and Phylogenies for Species Modelling:**
 - Tackling the problem of species modelling in the paucity of labelled training data.
 - Infusing taxonomic and phylogenetic information into model training.
 - Improving model interpretability by learning visual features that resemble biological traits.
 - Using visualization tools to help biologists answer questions about species and their defining anatomical traits.

Visual Surveillance Group, McGill University

Graduate Research Assistant

January 2010 — April 2012

- Supervised by Prof. Martin D. Levine.
- Thesis: Real-Time Automated Annotation of Surveillance Scenes:**
 - Developed a real-time video surveillance system that detects semantically defined activities of interest.
 - Improved the performance of low-level processing and object tracking.
 - Devised a framework for detecting events that are of interest to public spaces surveillance.
- Unconstrained real-time face recognition using face morphing and SVM classifiers.**

Honors and Awards

Pratt Fellowship - Virginia Tech

July 2021

- Awarded to a limited number of exceptional applicants admitted to the Computer Science and Applications graduate program.

Wake Award - Society for Integrative and Comparative Biology (SICB)

October 2020

- Nominated for the Best Student Paper.

Special Stock Award - Microsoft

September 2018

- Awarded to exceptional employees for their contributions in areas of great impact.

Provost's and Principal's Graduate Fellowship - McGill University

February 2010

- Awarded to recruit high-caliber students.

Workshop Papers, Presentations, and Posters

- **Mohannad Elhamod**, Kelly M. Diamond, A. Murat Maga, Yasin Bakis, Henry L. Bart, Paula Mabee, Wasila Dahdul, Jeremy Leipzig, Jane Greenberg, Brian Avants, and Anuj Karpatne. Graduate Teaching Experience

I have lectured, created assignments and material, held office hours, and graded the following classes:

- **Data-Centric Computing Capstone** (Instructor): A class of 20 students at the CS department at Virginia Tech.
- **Data Analytics** (Teaching Assistant): A class of more than 70 students at the CS department at Virginia Tech (2 semesters).
- **Computer and Biological Vision** (Teaching Assistant): A course on image processing that connects biological and computer vision. A class of more than 40 students at the ECE department at McGill University.
- **Artificial Intelligence** (Teaching Assistant): A class of more than 40 students at the ECE department at McGill University.

Work Experience

Microsoft – Azure Monitoring

April 2016 – July 2019

Software Engineer II

- A member of *Application Insights/Azure Monitoring* team.
- Worked on *Metrics Explorer*, a feature that allows millions of customers to visualize and analyze their data.
- Lead *Azure Monitoring's* product accessibility compliance efforts to provide a seamless experience for people with disabilities.

Microsoft – Microsoft Edge

March 2013 – April 2016

Software Engineer I

- Worked on core features on the *Windows Phone* platform, such as InPrivate experience and tabs center.
- Lead the product's accessibility compliance efforts to provide a seamless experience for people with disabilities.

Professional Service

Reviewer and Program Committee member <i>SGAI-AAA</i>	2021
Reviewer <i>IEEE-TETCI</i>	2021
External Reviewer <i>KDD</i>	2021
Co-organizer <i>Great Lakes Bioinformatics Conference</i>	2021
CS Grad Council board member <i>Virginia Tech</i> <ul style="list-style-type: none">○ Elected as Treasurer.○ Lead efforts for promoting student rights and resolving student-advisor conflicts.○ Hosted a workshop on building healthy student-advisor relationships.	2020 – 2021
Interdisciplinary Research Honor Society member <i>Virginia Tech</i>	2021
CS delegate to Graduate and Professional Student Senate <i>Virginia Tech</i>	2019 – 2020
Hosted a talk titled “The Graduate Student and Self-Worth”. <i>Virginia Tech</i>	2020

Extracurricular Activities, Skills, and Projects

Delivered a talk on “Dynamic Split Points in a Decision Tree”. <i>Seattle’s Chapter of “Papers We Love”</i>	2020
SQUEAKY, the Robot <i>Microsoft Hackathon</i> Used <i>Microsoft Azure Cognitive Services</i> to train a robot to recognize people’s faces and address them by name.	2017
Martial Artist A 3rd kyu in both Aikido and Karate.	
Blogger Writing an educational blog for Arab audience.	
Photographer A photography enthusiast with a wide range of interests.	
Musician A member of Itraab Arabic music ensemble	
Amateur Stand-up Comedian
